

# The First Frontal Impact Airbag System for Ambulances

Mbrace integrates an airbag into the multi-point restraint system. It deploys and moves with emergency care providers in **frontal impact collisions** and **rollovers**.

## The New Safety Standard

Mbrace is now available as an option on all new Type I and III ambulances for the attendant seat\* and for side-facing positions, which include the CPR seat and squad bench.

\*Mbrace will not be installed in the attendant seat if an Integrated Child Seat (ICS) is installed.

## Safety and Freedom to Work

MBrace is innovatively designed to give first responders the freedom to do their jobs—providing access to patients and supplies while remaining secured in a four-point harness with one point of connection.

## Partnering with the Best

Developed and tested in partnership with IMMI.

# The American-Crafted Experience™

At the heart of AEV is our unwavering commitment to caring for our customers. We are inspired by a calling to build ambulances with the highest standards of American-crafted excellence and approach every relationship with equally high standards. We do that by manufacturing superior products and delivering an outstanding experience with a welcoming spirit and warmth that extends long after the sale.
